^a Includes supplemental gaseous fuels.^b Liquefied petroleum gases.^c Conventional hydroelectric power. Does not include pumped-storage hydroelectricity.^d Incurred in the generation, transmission, and distribution of electricity plus plant use and unaccounted for electrical system energy losses.^e Small amounts of solar thermal and photovoltaic energy consumed in the commercial sector cannot be separately identified and are included in residential consumption.

(s) = Value less than 0.05 trillion Btu.

Note: Totals may not equal sum of components due to independent rounding.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
